

Four Winds IT

CLOUD ENGINEER | SARASOTA, FL | CONSULTING – CLOUD | FULL-TIME

Four Winds IT is immediately hiring a Cloud Solutions Engineer. This position will be located in the Sarasota, FL area and remote. We offer a competitive salary and solid benefits package.

Who you are:

You are a seasoned and passionate hands-on Solutions Engineer architect with in-depth skills with Public Cloud and DevOps technologies. Your breadth of knowledge and depth of experience allows you to act as a leader and SME while developing innovative solutions. You are comfortable with providing guidance, strategy, and advising on best practices for a variety of clients and technical environments. Your solid communication skills mean that you can easily present to technical and non-technical audiences alike, including C-level executives. You are eager to join an exciting, rapidly growing team at a company where you can immediately start to make an impact. You would thrive in a role that requires you to work quickly and efficiently under minimal supervision.

Education and Experience:

High School diploma required. Bachelor's degree in the computer field is a plus. Minimum of 2 years of Cloud and/ or DevOps solutions architecture experience. Subject matter expertise in DevOps tools and methodologies. In-depth knowledge and experience with all 3 major public cloud providers (AWS, Google Cloud, and Azure). Must have Terraform, Kubernetes, Python, Ansible. Architect-level cloud certifications (preferred). Excellent leadership and advisory skills. Impeccable written and verbal communication skills, ability to present to and comfortably speak with executives.

Essential Job Functions:

- Working with client stakeholders to drive strategy, facilitate collaboration, and deliver strategic planning artifacts to feed the strategic planning process
- Working with customer and commercial partners to align strategy to marketplace strategy
- Leading and contributing to strategic planning forums and customer strategic planning initiatives
- Leading architecture team to develop and deliver strategic, value-driven solution architectures
- Delivering solution architectures to execution teams, communicating their value and ensuring implementation viability and success
- Chairing and contributing to the Architecture board to ensure solutions are built in line with architecture and architectures are aligned to business and mission outcomes
- Building and maintaining technology roadmaps ensuring due diligence and a realistic implementation path Driving experiments to evaluate new technologies and methodologies to accelerate project delivery

Essential Job Functions (Continued):

- Delivering timely, effective, easily understandable, concise technical studies and market research
- Developing solutions for AWS, Google Cloud, and Azure
- Working closely with client engineering teams to implement solutions to cloud and data services requirements
- Assisting in the triage of other projects/programs and making technical recommendations to senior-level leadership
- Utilizing highly developed communication skills to achieve stated business outcomes
- Effectively executing strategic communications on current and future technology initiatives
- Communicating strategy and technology with senior stakeholders, leadership, and executives
- Ensuring regular, effective communication happens with team members and cross-functional resources
- Serving as leader and subject matter expert in cloud and DevOps technology
- Providing training and customer technical workshops to drive technology adoption, active customer engagement, and participation
- Building collaborative forums to seek forward-thinking solutions that anticipate and drive positive change
